SUMMARY

Junior front-end developer with experience in React, TypeScript, and full-stack web applications. Delivered a production-deployed dissertation project with ML-powered recommendations, JWT auth, and 4,000+ titles. Self-driven learner comfortable with AI-assisted development workflows and modern frontend tooling.

EXPERIENCE

Web Developer Internship | Gypaetus Code | Alba Iulia, Romania | June 2023 - July 2023

- Built a React + Laravel web application integrating an OpenAI-powered chatbot.
- Implemented user authentication, API connections, and deployment workflows using Git and Docker.

PROJECTS

MovieFlix | disertatie-frontend.vercel.app/ | Jan 2025 - May 2026

- **Dissertation project:** full-stack movie and TV recommendation platform cataloguing 4,000+ titles (2,700 movies, 1,500 TV shows), built with React, TypeScript, Tailwind CSS, Flask, MongoDB Atlas, scikit-learn, and JWT authentication.
- Implemented hybrid recommendations (content-based, collaborative filtering, cold-start onboarding) with AI-generated explanations and conversational discovery.
- Deployed with decoupled frontend/backend hosting via Vercel and Render.

Memory Card Game | memorycardleague.netlify.app | 2026

- React memory card game built as part of The Odin Project coursework; demonstrates hooks, state management, and dynamic rendering across 3 difficulty levels (6–18 League of Legends cards).

WebScraperLLM | github.com/Cloudiu9/WebScraperLLM | Oct 2024 - Nov 2024

- **University course project:** scraped and structured 10+ years of political speeches (Jan 2014 – Nov 2024) from the Kremlin website using Selenium, BeautifulSoup, and Streamlit, with optional LLM processing and JSON export.
